EDUCATION

B.Tech, CSE (Data Science)
Jaypee University of Engineering &
Technology, Guna
2025 – Present | CGPA: 8.89

CERTIFICATIONS

The Ultimate Job Ready Data Science Course
CodeWithHarry · 2026
Data Science & Analytics
HP LIFE, HP Foundation · 2025
CodeSrijan National Hackathon 2026
Certificate of Participation, JUET · Apr 2026

TECHNICAL SKILLS

LANGUAGES

Python C C++

JavaScript

DATA SCIENCE / ML

Pandas Scikit-learn

PyTorch NumPy PuLP

Reinforcement Learning

WEB & BACKEND

React Next.js FastAPI

Streamlit Node.js

DATA & DEVOPS

PostgreSQL SQLAlchemy

Docker Git

SOFT SKILLS

English Speaking Communication

Leadership Team Management

Problem-Solving Adaptability

Mohammad Aasim Ansari

Data Science & Machine Learning Enthusiast

Data Science undergraduate at JUET with hands-on experience building end-to-end machine learning and full-stack applications — from reinforcement learning traffic systems to optimization-driven web apps. Strong foundation in Python, statistical modeling, and data-driven problem solving, complemented by proven leadership and communication skills from technical fest management and national-level hackathons.

Experience

Web Development Intern — SkillCraft Technology

Oct 2025

- Completed a hands-on educational internship applying front-end and software development practices to real-world project tasks under structured company workflows.

Core Committee Member — Tachyon '25 (Annual Technical Fest, JUET)

2025

- Orchestrated sponsorship outreach and logistical/promotional operations for a university-wide technical festival, collaborating cross-functionally on materials and event schedules.

Projects

IPL Auction Optimizer

Python · Streamlit · FastAPI · Pandas · Scikit-learn · PuLP · SQLAlchemy

- Built a data-driven web app applying linear programming (PuLP) to optimize IPL team auction strategy under budget and squad constraints.
- Designed Pandas/Scikit-learn pipelines for player valuation, served via a FastAPI backend and Streamlit interface.

Traffic Intersection AI

Python · PyTorch · Deep Q-Network (RL) · Gymnasium · FastAPI · WebSockets · Docker

- Developed a Deep Q-Network reinforcement learning agent to optimize real-time traffic signal control at intersections.
- Built a FastAPI + WebSockets backend for real-time visualization, containerized with Docker for reproducible deployment.

Smart Expense Tracker

Next.js · React · FastAPI · PostgreSQL · Pandas · Scikit-learn · Docker

- Built a full-stack expense tracker (web + Android via Capacitor) with ML-driven spend pattern analysis.
- Implemented an async PostgreSQL data layer (SQLAlchemy + Alembic) and automated PDF reporting via Docker Compose.

Jarvis — AI Assistant

Node.js · Python · Puppeteer · SQLite · LLM Routing · TTS/STT

- Built an AI assistant combining Node.js automation with a Python LLM router, integrating scraping, speech, and email capabilities.

Kisan Sahayak AI — AI for Bharat Hackathon (Team QBit4)

Web App · Image Processing · Multilingual Voice Input · AI Diagnosis

- Built a crop disease prediction app with image upload and regional-language voice input; led roadmap and pitch deck.

Achievements & Interests

- Active member of the University Engineering & Robotics Club; preparing for GATE 2029 (CS / Data Science & AI).
